

# CopyRIP

**SUPERSPOOLER  
NEST-O-MATIK  
STEP & REPEAT  
ICC CALIBRATION**

## PRINT

**CopyRIP** is a powerful and easy to use desktop RIP solution which delivers all the features you need to print professionally.

Discover Caldera's intuitive interface and super fast preflight and preview features. **CopyRIP enables you to quickly crop, rotate, resize and colour enhance the document before printing.** Whether used for processing PostScript, PDF or raster files, CopyRIP delivers high quality output with its powerful ICC compliant RIP engine.

**CopyRIP also includes Step & Repeat and Nest-O-Matik™ features** that will automatically optimize your media usage. With its **Super Spooler**, you get "live" control and simultaneous access to your files in process, on any driven printer. Stop, release, reorder, change the number of copies of any job in real time, on your workstation or using a remote web browser.

## MARKETS

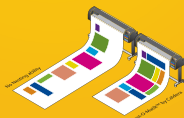

Large format printers with a small production capacity on essentially aqueous type printers or small solvent printers

## KEY FEATURES

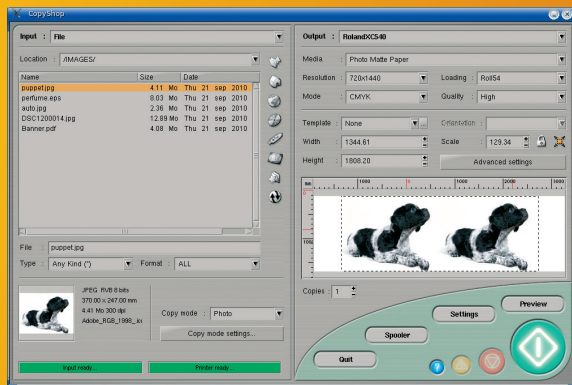

### Step & Repeat :

Sophisticated automatic feature to repeat files on a page. File is RIPed only once

### Nest-O-Matik™ :

Automatically positions files across the roll or sheet for media and ink optimisation

CopyRIP's main interface
